

# Jet Slim Hand Dryer

- ▶ Lightweight 5.8kg build with a slim 175mm profile for easy installation
- ▶ 90 m/s high-speed airflow delivers dry hands in just 8–10 seconds
- ▶ Removes 99.9% of airborne particles for cleaner, purified airflow
- ▶ Automatically activates heating below 25°C to optimize comfort and energy efficiency
- ▶ Operates at a comfortable 70 dB(A), suitable for commercial environments
- ▶ Clear LED countdown timer enhances the user experience
- ▶ Removable drip tray helps maintain dry, slip-free floors
- ▶ IP24-rated with a durable, impact-resistant ABS polycarbonate casing

## Space-Saving Design and Versatile Installation

The Jet Slim Hand Dryer is engineered to maximise facility efficiency through its ultra-slim 175mm profile and lightweight 5.8kg build. This compact design is specifically developed for modern, space-restricted washrooms where traditional, bulkier units might obstruct walkways or fail to meet accessibility standards. Its lightweight construction also ensures a versatile installation, allowing for secure mounting on a wider variety of wall types without the need for additional structural reinforcement.

## High-Throughput Performance

Operational efficiency is driven by a high-speed 90 m/s airflow that delivers a complete dry in just 8–10 seconds. This rapid performance is critical for high-traffic environments, significantly increasing user turnover and preventing washroom bottlenecks.

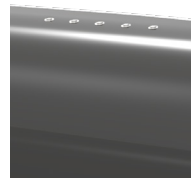

## Smart Auto Temperature Adjustment

To balance user comfort with sustainability, the unit features an intelligent climate control system that automatically activates the heating element only when ambient temperatures drop below 25°C. This “set-and-forget” technology ensures a warm, comfortable experience during colder months while drastically reducing unnecessary energy consumption and operational costs during warmer periods.

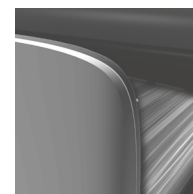

## Specifications

<b>Drying Time</b>	8–10 seconds
<b>Air Speed</b>	90 m/s
<b>Sound Level</b>	70 dB(A) @ 1m
<b>Filtration</b>	99.9% HEPA filter
<b>User Interface</b>	Intuitive LED countdown timer
<b>Climate Control</b>	Intelligent heating (Auto-activates below 25°C)
<b>Hygiene</b>	Integrated removable drip tray
<b>Operating Voltage</b>	220-240VAC / 50-60Hz
<b>Rated Power</b>	1400-1750W (adjustable)
<b>Motor Type</b>	750W Brushed motor
<b>IP Rating</b>	IP24
<b>Dimensions</b>	556(H) x 296(W) x 175(D) mm
<b>Net Weight</b>	5.8 kg
<b>Cable Access</b>	Bottom left
<b>Compliance</b>	UKCA, CE, RoHS, REACH
